

Bell 407

Ergonomic & Efficient Surveillance Solution

Bell 407 Polish Police, Operator Workstation

FEATURES

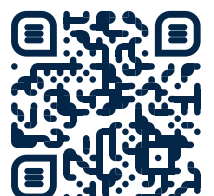

- EASA/FAA approved STC
- Adjustable Operator Workstation
- Customized Working Environment
- Weight-Sensitive Design
- Retrofittable Kit

State-of-the-Art Aerial Supervision

This state-of-the-art ISR-equipped helicopter is designed for demanding surveillance capabilities. With the flexibility to incorporate both horizontal or vertical screens, we offer extensive customization options. The workstation's adjustability ensures an ergonomic sitting position for the operator. In addition to the EO/IR sensor and searchlight, a cutting-edge audio system (including SATCOM communication and tactical radios) completes the surveillance suite.

The versatile solution accommodates various mission requirements, providing adaptability and efficiency in diverse operational scenarios.

Designed for Precision

BELL 407

Ergonomic & Efficient Surveillance Solution

The Airborne LINX Mission Suite includes:

- 1 Operator Workstation**
 - Augmented Reality System
 - Video/Voice/Data Recorder
